Overview

The Graduate Certificate of Data Science is for students who want to expand their knowledge of computer science and data analytics. This course will build on a student's undergraduate qualifications or relevant industry experience, with an emphasis on managing, interpreting and visualising data sets. Students will study a project-based learning unit and graduate ready to work in data-driven decision-making roles.

Upgrade your skills

The Graduate Certificate of Data Science course trains the students to develop fundamental knowledge and practical skills in data preparation, visualisation, and superficial analysis. It provides students with skill set for processing big data, operating in projects, and application creation at the entry-level.

Stretch your career further

-  Data engineer
-  Junior data scientist
-  Junior data analyst

International student visa

International students in Australia who hold student visas are required to study full-time and on campus. Courses that are taught entirely online are only available to international students studying outside Australia or those in Australia who are not on a student visa. Online courses are not available to international students in Australia who hold a student visa.
